

Red Feather Mountain Library District

April 17, 2024, Board meeting

Library Director Creed Kidd's report

Building & Grounds

Charlie Stoddard (sited in Greeley) is scheduled to repaint the library exterior towards the end of May.

Electrician Pat Conroy is installing the Stenzel Room lights today, April 12.

The two privacy pods are scheduled to arrive and be installed in the Stenzel Room towards the middle of June. A pod reimbursement check ~\$36,000 from Larimer County/North 40 Alliance has been received.

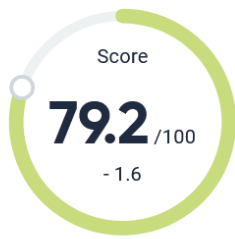

Discussion with Schraeder's regarding the purchase of a second 1,000 propane tank with an on-site inspection to be made by the firm regarding viability.

Website accessibility

Adjustments and fixes continue. State consultant Babi Hammond has provided access to a web diagnostic tool, SiteImprove, that allow a numerical scoring of a given website:

Digital Certainty Index

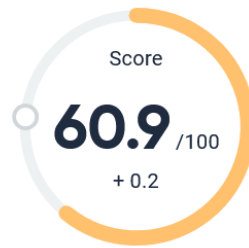

Site: Red Feather Lakes Community Library

Fix this issue and reach 86.2 points: [Broken links at page level 3 and deeper](#)

Quality Assurance

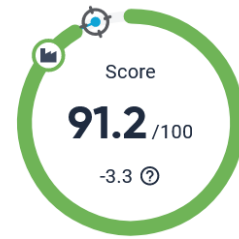

Site: Red Feather Lakes Community Library

Fix this issue and reach 81.9 points: [Broken links at page level 3 and deeper](#)

Accessibility

Site: Red Feather Lakes Community Library

Review this potential issue to reach up to 92.1 points
[Do these links \(in the same context\) go to the same page?](#)

ReciteMe accessibility toolbar has been licensed but not yet installed. An example of use can be found at <https://www.clicweb.org/>

Library cybersecurity / physical security

Continuing evaluation of library defences and proactive discussion with library staff and volunteers.

Repair/added components to our existing SimpliSafe security system.

Library power and service outage, April 6, and 7th

With the surrounding community we shared the wind-caused power outages of Saturday afternoon through Sunday. We closed Sunday, April 7.

We had a service call with the vendor, Sandbox Solar, Thursday, April 11, determining why we had no system backup as designed.

Issues determined included tripping of the switches across all 6 solar batteries, another switching issue across batteries, and a now third instruction set in starting and operating the backup generator: the installer of the genset; John Parker; and now Sandbox Solar.

In any event this brings up the issue of the library being a source of community safety: a point that recommended for discussion.
